

GRAPHCORE

UK GENDER PAY
GAP REPORT
2022 - 2023

INTRODUCTION FROM CEO

Our experience tells us that companies succeed when diverse people come together with a shared purpose. We want everyone at Graphcore to be true to themselves while doing their best work contributing to something that has the potential to change the world. That's why one of our core values is 'Be your best and be yourself'.

While we are pleased that our gender pay gap has improved slightly since our last report, we know we need to make much more progress and we continue to take practical steps to increase female representation at Graphcore. We actively seek to increase our female talent pipeline for roles at all levels and work to ensure our early careers program attracts more women to pursue engineering careers. We outline some of the activities already underway at Graphcore later in the report.

We also use Gender pay gap reporting, to go beyond the statutory requirements and to understand the context for our gender representation and remuneration.

Deeper analysis of our gender remuneration data found that there is no statistically significant variance in base pay between men and women at Graphcore. While non-technical teams have fairly balanced male and female representation, like many other tech firms, we have far fewer women in engineering at all levels, particularly in senior roles. As the vast majority of our UK team is in engineering, we have a gender pay gap.

We continue to challenge ourselves to ensure fairness and to remove barriers to progress for everyone. We have robust processes in place to ensure we have a level playing field in career development, promotion and compensation, regularly benchmarked against external market data. We have introduced a Diversity, Equity and Inclusion Committee, made up of a diverse team of people at all stages of their careers, to help us listen to and act on feedback and to lead wider diversity and inclusion initiatives. There is more work to do and measurable policies like the UK gender pay gap reporting are crucial for making sure we continue to make progress in the right direction

Nigel Toon **CEO & Co-Founder, Graphcore**

I confirm that the gender pay gap data is accurate for Graphcore limited and has been calculated in accordance with ACAS and GEO Guidance

GRAPHCORE

WHAT IS GENDER PAY GAP REPORTING?

UK gender pay gap reporting calculates the difference between the hourly earnings of men and the hourly earnings of women in a company. Earnings include base pay, allowances and any bonus and other incentive pay. The gender bonus gap is the difference in the bonus pay received by men and women.

The UK Government requires all UK companies with over 250 employees to annually publish figures on median and mean UK gender pay gap, median and mean gender bonus gap, the proportion of men and women receiving bonuses and the proportion of men and women in each quartile of the organisation's pay structure. This contrasts with equal pay for equal work, which continues to be a legal requirement.

Median

The median is the middle number when you have ranked pay from lowest to highest. This is often considered to be the best representation of typical pay as extremes of low and high pay do not affect it.

Mean

The mean is calculated by adding up the total pay of employees and dividing by the number of employees in the list. This calculation is completed separately for men and women. While useful, this true average is easily skewed by a small number of high or low earners.

GRAPHCORE FIGURES

This report sets out the UK gender pay gap and gender bonus gap at Graphcore as well as other data required by the Equality Act 2010 (Gender Pay Gap Information) Regulations 2017.

The pay data of 426 UK Graphcore employees was analysed, including all UK full and part-time employees, on 5 April 2022. Bonus data is from 5 April 2021 to 4 April 2022.

	Gender Pay Gap	Gender Bonus Gap
Mean	22.4%	40.2%
Median	23.2%	36.8%

Proportion of male and female employees who receive a bonus

Pay Quartiles

The proportion of male and female employees according to quartile pay bands

BUILDING DIVERSITY & INCLUSIVITY AT GRAPHCORE

We know that it will take time to truly address our UK gender pay gap. To do this we commit to fair and unbiased recruitment processes, robust probation and reward systems and a safe, inclusive work environment where everyone can do their best work. A number of programs and core approaches already underway at Graphcore include:

Recruiting female talent

We are actively focused on increasing the proportion of women joining Graphcore at all levels. We support several female engineering societies and have regular outreach and mentoring with female computer science and electronic engineering undergraduates. While the majority of new hires still remain in the lower two pay quartiles, we are challenging ourselves to ensure that we have at least one woman on the shortlist for senior roles.

Unbiased recruitment

We strive to remove bias from our recruitment processes, for example by ensuring the language used in job adverts is inclusive and gender balanced, and by holding unconscious bias training for hiring managers and interviewers. We have a structured interview process to make recruitment as objective as possible and all candidates are treated equally and fairly. We use skills based assessments for our technical roles to evaluate based on ability and not just interview performance. As part of our early careers program we hold skills seminars to support students through this process and encourage participation.

Pay & Progression

We are committed to offering a fair, equal and unbiased reward system and have rigorous processes in place to enable this. When conducting our annual compensation review and promotions process we ensure everyone is treated fairly and we objectively review pay between men and women performing similar roles and moving roles. We will be investing in new tools to help us more easily and more frequently analyse our compensation data with the gender gap firmly part of the review process.

GRAPHCORE

BUILDING DIVERSITY & INCLUSIVITY AT GRAPHCORE

Flexible working practices

We have a generous parental leave and pay programme for new parents. We have always had a flexible working approach so individuals can choose their start and finish times to help manage caring responsibilities or just to ensure a better work/life balance. While most people choose to work from our offices, we have a hybrid working policy and most people work from home some of the time. This is based on trust and responsibility and will continue for the long term. We firmly believe that our flexible and supportive environment nurtures an inclusive culture.

Development

All employees are offered the same development and progression opportunities, to help them reach their full potential, including development programmes for people managers and leaders. We have invested significantly in an online learning platform which will allow all our people to access to a variety of content to help them learn and grow in their careers, from Unconscious Bias and Creating Inclusive Environments to more technical material on Rust, C++ and ML.

Networking

We have several internal groups, such as Women at Graphcore, LGBTQ+ at Graphcore which have been created organically, allowing members to support and champion one another.

DE&I Committee

Our employee led Diversity, Equity and Inclusion committee helps Graphcore's DE&I strategy by increasing education and knowledge and by promoting wider diversity to build a diverse and inclusive culture at Graphcore.
